

Lidor Ladany

Fourth-year B.Sc. student in Electrical and Electronic Engineering at Ariel University, enrolled in a direct-track M.Sc. program.
Specializing in Electro-Optics and Quantum Science. Actively conducting research in developing a compact MMW imaging system using GDD-based up-conversion, quasi-optical design, and lock-in detection.
Available for a **full-time positions**.

👤 Profile

Good interpersonal relation, ability to **adapt to changes** quickly while meeting the task. I am a **fast learner**, **creative thinker** and a team player. Possessing excellent **time management skills** and the ability to work under pressure and **eager to evolve** in the field.

🎓 Education

Student towards a M.Sc. (Direct Track) in Electrical and Electronic Engineering - Ariel University

2025 – present

Research focus: Development of a compact millimeter-wave (MMW) imaging system based on up-conversion using GDD detectors and **lock-in detection**. Work includes **quasi-optical system design** and characterization of the THz/MMW source, with emphasis on improving alignment and imaging performance.

Student towards a B.Sc. Degree in Electrical and Electronic Engineering - Ariel University

2022 – present

GPA 93.93 Fourth-year student specializing in Electro-Optics and Quantum Science.

🔧 Work Experience

Mechanical Assembly worker- Elbit Land and IAI

2021–2022

Collaborated closely with Mechanical and Electrical R&D engineers to find a **creative solutions** when problems arise in projects that are in development stages. **Responsible** for assembling advanced defense systems sold to countries around the world using valuable tools, while **self-learning** of reading engineering drawings (mechanical and electrical) of the required systems.

Military service

Helicopter Technician and team leader - 124 Squadron - Air Force (compulsory service + 3 months of contract service)

2019-2021

Performed maintenance service of helicopter systems using a range of diagnostic tools to identify and repair mechanical and technical issues. Supervised room system management tools - a position requiring a lot of **responsibility**. Worked continuously with senior officials requiring **good communication skills** under pressure. **Led a team** with high **attention to detail**, ensuring safety of many soldiers and conducting examinations on multiple helicopters. Trained and instructed new soldiers.

Achievements

Palmahim base Excellence (2020)
Dean's List, Ariel University (2024)

Languages

Hebrew - Native
English - Fluent

Skills

C++
Multisim
Python

Lab Knowledge

Oscilloscope
Function Generators
Lenses
Optical System Setup
Circuit Building
